Ordinary users' homepage

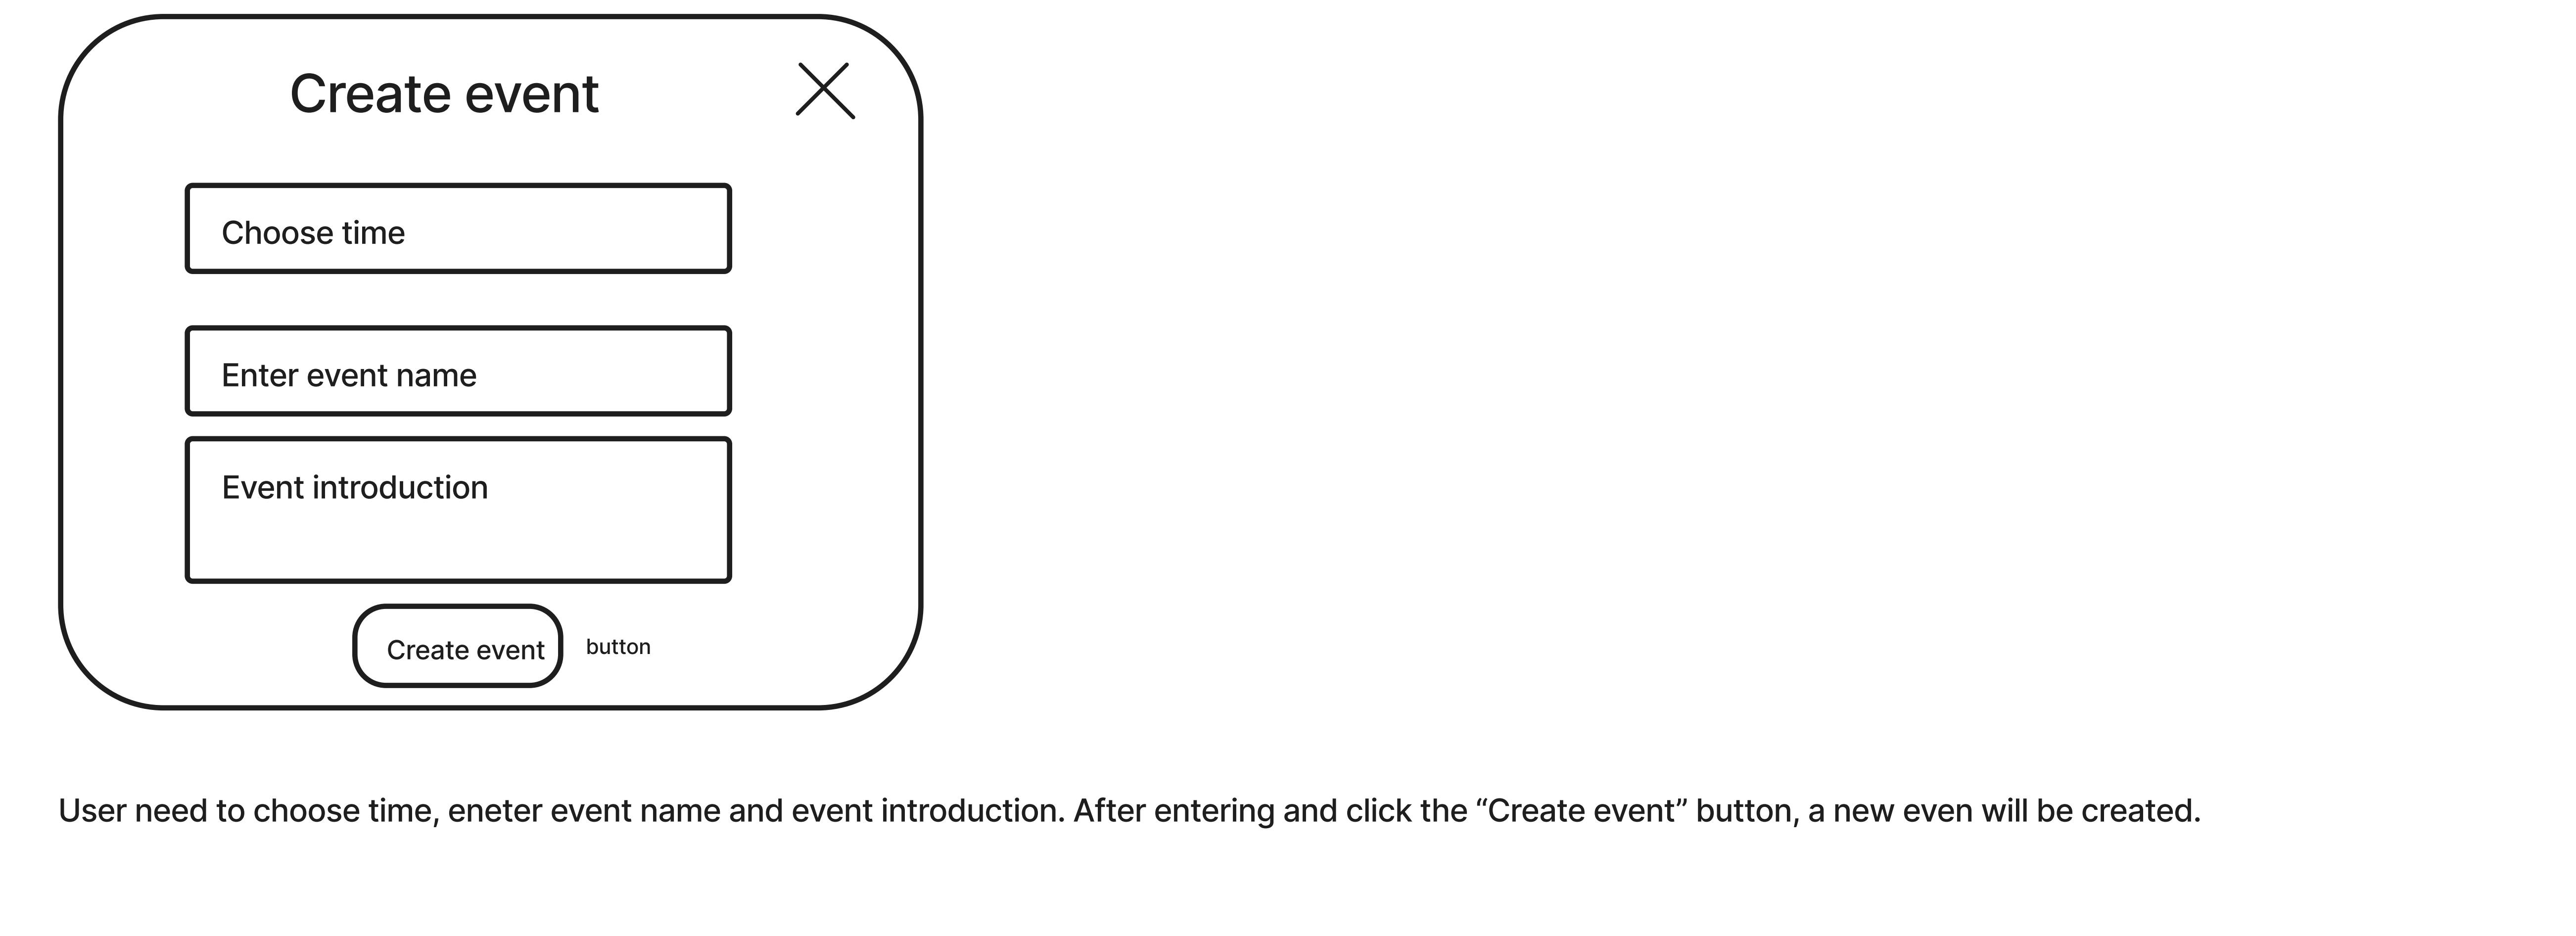

Administrators' homepage

The home page of ordinary user and administrator are different. is an icon that represents the function of a button.

Sign in/sign up page

Users with existing accounts can log in by entering username and password. New user can click the "sign up" button on the right to register. When a new user click "sign up" button, he or she will enter the sign up page (on the right). The user must enter a new username and password to generate a new account. Note: Each user has a unique username, so need to check if the username already exists. If the username already exists, a new account cannot be created and the user is reminded to change the username. If the username does not exist, the new account is generated successfully.

After clicking the "Home" button, return home page.

After clicking the "Create event" button

A dialog box titled 'Create event' with an 'X' button at the top right. It contains three input fields: 'Choose time', 'Enter event name', and 'Event introduction'. At the bottom is a 'Create event' button.

User need to choose time, enter event name and event introduction. After entering and click the "Create event" button, a new even will be created.

After clicking the "User information" button

A dialog box with an 'X' button at the top right. It contains fields for 'Username', 'Email', and 'Password', each with a corresponding input field. At the bottom are 'Modify' and 'Finish' buttons.

User can view their username, email and password. After click "Modify" button, they can modify their username, email or password. After clicking "Finish" button, the changes will be record.

After clicking the "Calendar" button

A calendar interface showing a month grid. The days of the week are labeled: MON, TUE, WED, THU, FRI, SAT, SUN. Some cells in the grid contain small tables with 'Time' and 'Event Name' entries. A specific cell in the third column of the second row is highlighted with a yellow background.

Return to the calendar interface and see if we book the activity successfully. We designed this button because we wanted to help users to show their scheduled activities in their own Google Calendar. Moreover, this makes it easier for users to check their events and remind them by Google Calendar. In addition, when a user creates a new event, it will be checked if there are any time conflicts with other events by the calendar. If there is a conflict, the creation of the event will fail. If not, then it succeeds and the new event will be added to the calendar.

Every user has their own calendar. The calendar page will show all their activities for the month. For today's event, the background box will be yellow to make it more visible.

After clicking the "Query Activity" button

A dialog box with an 'X' button at the top right. It lists four items, each consisting of 'Time' and 'Event Name' followed by a 'delete' button.

Click this button to query a list of all the activities going on at the current site. Why did we design this button? Because if there are too many activities, the activity information displayed on the homepage may be confusing for users and they cannot quickly find the activities they want to know about. This button allows users to quickly query activities.

After clicking the "Delete Activity" button

A dialog box with an 'X' button at the top right. It lists four items, each consisting of 'Time', 'Event Name', a 'delete' button, and another 'delete' button next to it.

Delete activities is the prerogative of the administrator. The purpose of this button is that when any user creates an activity, some activities that do not conform to the specification or expired activities can be deleted by the administrator to keep the interface clean and beautiful. Also, because regular users cannot delete an activity, if a regular user creates an incorrect activity, it cannot be modified. Therefore, it can only be deleted by the administrator himself.

After clicking the "Query People" button

A dialog box with an 'X' button at the top right. It lists four items, each consisting of 'Username' and 'Email' followed by a 'delete' button.

Querying users is one of the privileges of the administrator. When the administrator wants to know how many users have registered this website, as well as to know the specific information of users, the administrator can click this interface, view the list of current registered users, to get the information that administrator wants.

After clicking the "Delete People" button

A dialog box with an 'X' button at the top right. It lists four items, each consisting of 'Username', 'Email', a 'delete' button, and another 'delete' button next to it.

Deleting a user is one of the privileges of an administrator. When some users violate the rules of the site and are not real users but as a robot. For the security of the website, the administrator of the website needs to regularly check the registered users of the website and check whether the users need to be deleted.

After clicking the "Sign new Admin" button

A dialog box with an 'X' button at the top right. It contains fields for 'Username', 'Password', and 'Administrator code', followed by a 'Sign up' button.

Registering a new administrator is the prerogative of the webmaster. Only administrators can register a new administrator account by clicking this button. When an administrator clicks the "register a new administrator" button, a new interface will pop up to register the administrator instead of the normal user clicking the "log in" button of the "user" icon. The "Sign New Admin" button is dedicated to registering new administrators.
